JOURNAL OF GUIDANCE, CONTROL, AND DYNAMICS
Vol. 20, No. 6, November–December 1997

1997 *Journal of Guidance, Control, and Dynamics* Index

How to Use the Index

In the Subject Index, pages 1280–1285, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, pages 1286 and 1287, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 1288–1295, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1997, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index. The Book Review Index, page 1296, lists the books reviewed during 1997, the author, publisher, and reviewer, and the volume, issue number, and page on which the review appeared.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Minimum Drag Control Allocation G97-028
Frequency-Domain Optimal Estimator for Wing Rock Models G97-118

Aeroelasticity and Aeroservoelasticity

Robust Flutter Margins of an F/A-18 Aircraft from Aeroelastic Flight Data G97-093
Controller Reduction Using Normal Coordinates of Reconstruction Error Matrix and Component Cost Analysis Method G97-130
Induced Oscillations of a Finite Plate G97-181
Adaptive Control of Aeroelastic Instabilities in Transonic Flow and Its Scaling G97-183

Aerospace Plane

Near-Optimal Control of Altitude and Path Angle During Aerospace Plane Ascent G97-124
Optimum Mission Performance and Multivariable Flight Guidance for Airbreathing Launch Vehicles G97-179

Communication and Air Traffic Control

Trajectory Synthesis for Air Traffic Automation G97-039
Conflict Probability Estimation for Free Flight G97-092
Prototype Conflict Alerting System for Free Flight G97-121

Flight Control Integration

Minimum Drag Control Allocation G97-028

Flight Mechanics

Minimax Optimal Control Analysis of Lateral Escape Maneuvers for Microburst Encounters G97-058
New Penalty Functions and Optimal Control Formulation for Spacecraft Attitude Control Problems G97-070
Mixed H_2/H_∞ Method Suitable for Gain Scheduled Aircraft Control G97-111
Numerical Approach to Inverse Flight Dynamics G97-117
Bifurcation Analysis of a Highly Augmented Aircraft Model G97-119
Design of Deep Stall Protection for the C-17A G97-120

General Aviation

Comparison of Master Station and User Algorithms for Wide-Area Augmentation System G97-023

Man/Machine Interface

Pilot-Induced Oscillation Analysis and Prediction with Actuator Rate Limiting G97-010
Prediction of Pilot-in-the-Loop Oscillations Due to Rate Saturation G97-091
Unified Theory for Aircraft Handling Qualities and Adverse Aircraft–Pilot Coupling G97-177

Performance

Minimax Optimal Control Analysis of Lateral Escape Maneuvers for Microburst Encounters G97-058

Rotorcraft

Integrated Rotor-Flight Control System Optimization with Aeroelastic and Handling Qualities Constraints G97-037
Helicopter Attitude Command Attitude Hold Using Individual Channel Analysis and Design G97-151
Analysis of Adaptive Neural Networks for Helicopter Flight Control G97-152
Sequential Loop Closure in Design of a Robust Rotorcraft Flight Control System G97-189

Safety

Flight-Test Results of Propulsion-Only Emergency Control System on MD-11 Airplane G97-153

STOL/VTOL/STOVL

Limitations of Decentralized Control G97-060

Testing, Flight and Ground

Accuracy of Aerodynamic Model Parameters Estimated from Flight Test Data G97-009

Vibration

On-Line Version of the Eigensystem Realization Algorithm Using Data Correlations G97-018
Active Damping of Structures with Guy Cables G97-051
Identification of a Multistep-Ahead Observer and Its Application to Predictive Control G97-184

Fluid Dynamics

Vortices

Induced Oscillations of a Finite Plate G97-181

Wave Motion and Sloshing

Modeling Fluid–Structure Interaction G97-187

Guidance, Control, and Dynamics Technology

Aircraft Dynamics

Time-Domain Finite Element Method for Inverse Problem of Aircraft Maneuvers G97-012
Noetherian Perspective of Eulerian Motion of a Free Rigid Body G97-029
Numerical Approach to Inverse Flight Dynamics G97-117
Frequency-Domain Optimal Estimator for Wing Rock Models G97-118
Bifurcation Analysis of a Highly Augmented Aircraft Model G97-119
Adventures on the Interface of Dynamics and Control G97-166
Compensation for Distributed Hysteresis Operators in Active Structural Systems G97-176
Aerodynamic Parameter Estimation for High-Performance Aircraft Using Extended Kalman Filtering G97-193

Aircraft Guidance

Comparison of Master Station and User Algorithms for Wide-Area Augmentation System G97-023
Trajectory Synthesis for Air Traffic Automation G97-039
Extremal Angle of Attack over a Singular Thrust Arc in Rocket Flight G97-061
Analytical Solutions for Exponentially Correlated Acceleration Tracking Filters G97-064
Finite Horizon Static Output H_∞ Control with Automatic Beam Guidance Application G97-087
Output Tracking with Nonhyperbolic and Near Nonhyperbolic Internal Dynamics: Helicopter Hover Control G97-090
Conflict Probability Estimation for Free Flight G97-092
Numerically Efficient Robustness Analysis of Trajectory Tracking for Nonlinear Systems G97-164
New Procedure for Deriving Optimized Strapdown Attitude Algorithms G97-108
Near-Optimal Horizontal Trajectories for Autonomous Air Vehicles G97-116

Aircraft Stability and Control

Origins, Evolution, and Future of Satellite Navigation G97-001
Nonlinear Flight Control Using Neural Networks G97-002
Uncertainty Modeling and Fixed-Order Controller Design for a Hypersonic Vehicle Model G97-004
Flight Control Applications of l_1 Optimization G97-005
Accuracy of Aerodynamic Model Parameters Estimated from Flight Test Data G97-009
Flight Control System Design with Rate Saturating Actuators G97-011
Missile Autopilot Design Using a New Linear Time-Varying Control Technique G97-020
Flight Control System Design by Self-Organizing Fuzzy Logic Controller G97-027
Parameter Varying Control of a High-Performance Aircraft G97-038
Robust Controller Design with Damping and Stability Specifications G97-065
Missile Control Using Fuzzy Cerebellar Model Arithmetic Computer Neural Networks G97-088
Prediction of Pilot-in-the-Loop Oscillations Due to Rate Saturation G97-091
Maneuvering Flight Control with Actuator Constraints G97-115
Approximations for Quantitative Feedback Theory Designs G97-131
Robust Longitudinal Control Design Using Dynamic Inversion and Quantitative Feedback Theory G97-147
Analysis of Adaptive Neural Networks for Helicopter Flight Control G97-152
Nonlinear Adaptive Control of Spacecraft Maneuvers G97-172
Compensation for Distributed Hysteresis Operators in Active Structural Systems G97-176
Unified Theory for Aircraft Handling Qualities and Adverse Aircraft–Pilot Coupling G97-177
Analytical Relationships for Linear Quadratic Aeroelastic Flight Control Eigenvalues G97-178
Sequential Loop Closure in Design of a Robust Rotorcraft Flight Control System G97-189

Artificial Intelligence

Evaluation of Star Identification Techniques G97-043
Missile Control Using Fuzzy Cerebellar Model Arithmetic Computer Neural Networks G97-088

Digital Modeling and Digital Redesign of Analog Uncertain Systems Using Genetic Algorithms G97-114
Prototype Conflict Alerting System for Free Flight G97-121
Improved Pilot Model for Space Shuttle Rendezvous G97-133

Astrodynamics

Orbital Maneuvers via Feedback Linearization and Bang–Bang Control G97-013
Range-Rate Control Algorithms and Space Rendezvous Schemes G97-034
Optimal Earth–Moon Trajectories Using Nuclear Electric Propulsion G97-040
Evaluation of Flat-Earth Approximation Results for Geopotential Missions G97-041
Optimal Earth–Moon Trajectories Using Combined Chemical–Electric Propulsion G97-042
Strategy for the Passive Maneuvering of Tether-Connected Systems G97-046
Nonlinear Dynamics of the Tethered Subsatellite System in the Station Keeping Phase G97-066
V_∞ Leveraging for Interplanetary Missions: Multiple-Revolution Orbit Techniques G97-067
Annihilation of Transverse Velocity Bias During Spinning-Up Maneuvers G97-068
Planar Aeroassisted Attainability Domain G97-069
Optimal Steering for North–South Stationkeeping of Geostationary Spacecraft G97-071
Suboptimal Singular Orbital Transfer G97-094
Low-Thrust Orbit Raising with Coupled Plane Change and J_2 Precession G97-095
Close-Approach Trajectories in the Elliptic Restricted Problem G97-125
Optimal Low-Earth-Orbit–Geostationary-Earth-Orbit Intermediate Acceleration Orbit Transfer G97-126
Mechanics of Trajectory Optimization Using Nonsingular Variational Equations in Polar Coordinates G97-127
Minimum-Time Continuous-Thrust Orbit Transfers Using the Kustaanheimo–Stiefel Transformation G97-134
Reformulation of Edelbaum's Low-Thrust Transfer Problem Using Optimal Control Theory G97-154
Optimal Low-Thrust Interception of Earth-Crossing Asteroids G97-155
Trajectory Optimization Using Nonsingular Orbital Elements and True Longitude G97-156
Autonomous Optical Guidance and Navigation Strategy Around a Small Body G97-157
Adventures on the Interface of Dynamics and Control G97-166
Nonlinear Adaptive Control of Spacecraft Maneuvers G97-172
Orthogonal Square Root Eigenfactor Parameterization of Mass Matrices G97-174
Dynamics of a Dual-Probe Tethered System G97-196
Dynamical Characteristics of a Tethered Stabilized Satellite G97-197
Reversed-Series Solution to the Universal Kepler Equation G97-200

Computer Systems

Flight Control System Design with Rate Saturating Actuators G97-011

Control System Design

Nonlinear Flight Control Using Neural Networks G97-002
μ Controllers: Mixed and Fixed G97-003
Uncertainty Modeling and Fixed-Order Controller Design for a Hypersonic Vehicle Model G97-004
Flight Control Applications of ℓ_1 Optimization G97-005
Active Magnetic Damping Attitude Control for Gravity Gradient Stabilized Spacecraft G97-015
Missile Autopilot Design Using a New Linear Time-Varying Control Technique G97-020
Pilot Prefilter Design via H_∞ Model-Matching Approach G97-026
Flight Control System Design by Self-Organizing Fuzzy Logic Controller G97-027
Conjecture About Orthogonal Functions G97-031
Parameter Varying Control of a High-Performance Aircraft G97-038
Pole-Placement Technique for Magnetic Momentum Removal of Earth-Pointing Spacecraft G97-044
Design Impact of Piezoelectric Actuator Nonlinearities G97-052
Robustness of a Variable Structure Control System for Maneuverable Flight Vehicles G97-059
Analytical Solutions for Exponentially Correlated Acceleration Tracking Filters G97-064
Robust Controller Design with Damping and Stability Specifications G97-065
Nonlinear Control of a Proof-Mass Actuator G97-075
Piezoelectric Stack Actuators and Control System Design: Strategies and Pitfalls G97-077
Feasible Controller Design for Stochastic Systems G97-085
Finite Horizon Static Output H_∞ Control with Automatic Beam Guidance Application G97-087
Missile Control Using Fuzzy Cerebellar Model Arithmetic Computer Neural Networks G97-088
Predictive Filtering for Nonlinear Systems G97-089
Experimental Comparison of Robust $\mathcal{H}_2$ Control Techniques for Uncertain Structural Systems G97-097
Life-Extending Control of Reusable Rocket Engines G97-101
Experimental Verification of Vibration Reduction in Flexible Spacecraft Using Input Shaping G97-106
Geomagnetic Attitude Control of Satellites Using Generalized Multiple Scales G97-110
Mixed H_2/H_∞ Method Suitable for Gain Scheduled Aircraft Control G97-111
Feedback Control of Space Robot Attitude by Cyclic Arm Motion G97-113
Digital Modeling and Digital Redesign of Analog Uncertain Systems Using Genetic Algorithms G97-114
Design of Deep Stall Protection for the C-17A G97-120
Controller Reduction Using Normal Coordinates of Reconstruction Error Matrix and Component Cost Analysis Method G97-130
Approximations for Quantitative Feedback Theory Designs G97-131
On-Orbit Robust Control Experiment of Flexible Spacecraft ETS-VI G97-138
Approximate Decoupling Flight Control Design with Output Feedback G97-142
Analysis of the Frequency, Damping, and Total Insensitivities of Input Shaping Designs G97-144
Improved Eigenstructure Assignment Controller Design Using a Substructure-Based Coordinate System G97-148
Analysis of Adaptive Neural Networks for Helicopter Flight Control G97-152
Stability Analysis on Earth Observing System AM-1 Spacecraft Attitude Determination G97-161
Continuous Proximate Time-Optimal Control of an Aerodynamically Unstable Rocket G97-164
Adventures on the Interface of Dynamics and Control G97-166
Nonlinear Adaptive Control of Spacecraft Maneuvers G97-172
Orthogonal Square Root Eigenfactor Parameterization of Mass Matrices G97-174
Analytical Relationships for Linear Quadratic Aeroelastic Flight Control Eigenvalues G97-178
Identification of a Multistep-Ahead Observer and Its Application to Predictive Control G97-184
Differential Game Approach to the Mixed H_2/H_∞ Problem G97-188
Singularities of Nonlinear Attitude Control with Momentum Management G97-192
Low-Order Output Feedback Compensator for Tracking Systems G97-195

Control System Effectors

Pilot-Induced Oscillation Analysis and Prediction with Actuator Rate Limiting G97-010
Flight Control System Design with Rate Saturating Actuators G97-011
Minimum Drag Control Allocation G97-028
Disturbance Rejection Approach to Actuator and Sensor Placement G97-032
Maneuvering Flight Control with Actuator Constraints G97-115
Actuator and Exciter Placement for Flexible Structures G97-136
Flight-Test Results of Propulsion-Only Emergency Control System on MD-11 Airplane G97-153
Reduced Effort Control Laws for Underactuated Rigid Spacecraft G97-170
Nonlinear Viscoelastic-Plastic Mechanisms-Based Model of an Electrorheological Damper G97-175

Control System Sensors

Disturbance Rejection Approach to Actuator and Sensor Placement G97-032

Control Theory

Nonlinear Flight Control Using Neural Networks G97-002
μ Controllers: Mixed and Fixed G97-003
Uncertainty Modeling and Fixed-Order Controller Design for a Hypersonic Vehicle Model G97-004
Flight Control Applications of ℓ_1 Optimization G97-005
Pilot Prefilter Design via H_∞ Model-Matching Approach G97-026
Flight Control System Design by Self-Organizing Fuzzy Logic Controller G97-027
Conjecture About Orthogonal Functions G97-031
Disturbance Rejection Approach to Actuator and Sensor Placement G97-032
Parameter Varying Control of a High-Performance Aircraft G97-038
Closed-Loop Pole Design for Vibration Suppression G97-053
Second-Order Correction and Numerical Considerations for the Two-Step Optimal Estimator G97-057
Limitations of Decentralized Control G97-060
Fuel/Time Optimal Control of Spacecraft Maneuvers G97-063
Robust Controller Design with Damping and Stability Specifications G97-065

New Penalty Functions and Optimal Control Formulation for Spacecraft Attitude Control Problems G97-070
Optimal Regulation and Passivity Results for Axisymmetric Rigid Bodies Using Two Controls G97-074
Explicit Method for Parameter Identification G97-078
Feasible Controller Design for Stochastic Systems G97-085
Neighboring Extremal Control Design Using Error Compensation G97-086
Output Tracking with Nonhyperbolic and Near Nonhyperbolic Internal Dynamics: Helicopter Hover Control G97-090
Robust Flutter Margins of an F/A-18 Aircraft from Aeroelastic Flight Data G97-093
Numerically Efficient Robustness Analysis of Trajectory Tracking for Nonlinear Systems G97-104
Design of Constant Gain Dissipative Controllers for Eigensystem Assignment in Passive Systems G97-105
Experimental Verification of Vibration Reduction in Flexible Spacecraft Using Input Shaping G97-106
Mixed H_2/H_∞ Method Suitable for Gain Scheduled Aircraft Control G97-111
Digital Modeling and Digital Redesign of Analog Uncertain Systems Using Genetic Algorithms G97-114
Maneuvering Flight Control with Actuator Constraints G97-115
Applications of Canonical Transformations in Optimizing Orbital Transfers G97-122
Approximations for Quantitative Feedback Theory Designs G97-131
Verifying Robust Time-Optimal Commands for Multimode Flexible Spacecraft G97-132
Actuator and Exciter Placement for Flexible Structures G97-136
More on Gain Adaptive Tracking G97-140
Describing Function Analysis in the Presence of Uncertainty G97-150
Helicopter Attitude Command Attitude Hold Using Individual Channel Analysis and Design G97-151
Stability Analysis on Earth Observing System AM-1 Spacecraft Attitude Determination G97-161
Extension of the Friedland Parameter Estimator to Discrete-Time Systems G97-163
Continuous Proximate Time-Optimal Control of an Aerodynamically Unstable Rocket G97-164
Reduced Effort Control Laws for Underactuated Rigid Spacecraft G97-170
Nonlinear Predictive Control of Spacecraft G97-171
Compensation for Distributed Hysteresis Operators in Active Structural Systems G97-176
Analytical Relationships for Linear Quadratic Aeroelastic Flight Control Eigenvalues G97-178
Nonlinear Control of a Prototypical Wing Section with Torsional Nonlinearity G97-182
Identification of a Multistep-Ahead Observer and Its Application to Predictive Control G97-184
Differential Game Approach to the Mixed H_2/H_∞ Problem G97-188
Identification of Linear Model Parameters and Uncertainties for an Aircraft Turbofan Engine G97-199

Differential Games

Optimal Guidance with Reduced Sensitivity to Time-to-Go Estimation Errors G97-021
Neighboring Extremal Control Design Using Error Compensation G97-086
Stochastic Analysis of the Interception of Maneuvering Antisurface Missiles G97-112
Differential Game Approach to the Mixed H_2/H_∞ Problem G97-188

Dynamics

Active Magnetic Damping Attitude Control for Gravity Gradient Stabilized Spacecraft G97-015
Bifurcation of Self-Excited Rigid Bodies Subjected to Small Perturbation Torques G97-016
Articulated, Flexible Multibody Dynamics Modeling: Geostationary Operational Environmental Satellite-8 Case Study G97-045
Comparison of Inverse Modification Techniques for Some Gyroscopic Systems G97-048
Stability of a Spinning Axisymmetric Rocket with Dissipative Internal Mass Motion G97-049
Nonlinear Dynamics of the Tethered Subsatellite System in the Station Keeping Phase G97-066
New Penalty Functions and Optimal Control Formulation for Spacecraft Attitude Control Problems G97-070
Comparison of Analytical Modeling of OEDIPUS Tethers with Data from Tether Laboratory G97-076
Piezoelectric Stack Actuators and Control System Design: Strategies and Pitfalls G97-077
Higher-Order Cayley Transforms with Applications to Attitude Representations G97-084
Separation Dynamics of Strap-On Boosters in the Atmosphere G97-103
New Results for an Asymmetric Rigid Body with Constant Body-Fixed Torques G97-139
Optimal Reorientation Maneuver of Bias Momentum Spacecraft G97-168
Nonlinear Predictive Control of Spacecraft G97-171
Orthogonal Square Root Eigenfactor Parameterization of Mass Matrices G97-174
Nonlinear Viscoelastic-Plastic Mechanisms-Based Model of an Electrorheological Damper G97-175
Modeling Fluid–Structure Interaction G97-187

Engine Control

Life-Extending Control of Reusable Rocket Engines G97-101
Identification of Linear Model Parameters and Uncertainties for an Aircraft Turbofan Engine G97-199

Flight Mechanics

Noetherian Perspective of Eulerian Motion of a Free Rigid Body G97-029
Optimal Steering for North–South Stationkeeping of Geostationary Spacecraft G97-071
Separation Dynamics of Strap-On Boosters in the Atmosphere G97-103
Numerical Approach to Inverse Flight Dynamics G97-117
Close-Approach Trajectories in the Elliptic Restricted Problem G97-125
Trajectory Matching Flight-Path Optimization of Aerospace Vehicles G97-143
Reformulation of Edelbaum's Low-Thrust Transfer Problem Using Optimal Control Theory G97-154
Optimum Mission Performance and Multivariable Flight Guidance for Airbreathing Launch Vehicles G97-179

Handling Qualities

Pilot-Induced Oscillation Analysis and Prediction with Actuator Rate Limiting G97-010
Integrated Rotor-Flight Control System Optimization with Aeroelastic and Handling Qualities Constraints G97-037
Prediction of Pilot-in-the-Loop Oscillations Due to Rate Saturation G97-091
Helicopter Attitude Command Attitude Hold Using Individual Channel Analysis and Design G97-151
Unified Theory for Aircraft Handling Qualities and Adverse Aircraft–Pilot Coupling G97-177

Information Processing

Order N Formulation for Flexible Multibody Systems in Tree Topology: Lagrangian Approach G97-107
Prototype Conflict Alerting System for Free Flight G97-121

Launch Vehicle Dynamics

Separation Dynamics of Strap-On Boosters in the Atmosphere G97-103

Launch Vehicle Guidance and Control

Near-Optimal Guidance Law for Ballistic Missile Interception G97-056
Near-Optimal Control of Altitude and Path Angle During Aerospace Plane Ascent G97-124
Optimum Mission Performance and Multivariable Flight Guidance for Airbreathing Launch Vehicles G97-179

Missile Guidance and Control

Missile Autopilot Design Using a New Linear Time-Varying Control Technique G97-020
Optimal Guidance with Reduced Sensitivity to Time-to-Go Estimation Errors G97-021
Adaptive Robust Bank-to-Turn Missile Autopilot Design Using Neural Networks G97-055
Near-Optimal Guidance Law for Ballistic Missile Interception G97-056
Robustness of a Variable Structure Control System for Maneuverable Flight Vehicles G97-059
Terminal Area Navigation Using a Relative Global Positioning System Correction Vector Scheme G97-099
Stochastic Analysis of the Interception of Maneuvering Antisurface Missiles G97-112
Continuous Proximate Time-Optimal Control of an Aerodynamically Unstable Rocket G97-164
Autopilot Design for Bank-to-Turn Missiles Using Receding Horizon Predictive Control Scheme G97-191
Low-Order Output Feedback Compensator for Tracking Systems G97-195

Navigation

Origins, Evolution, and Future of Satellite Navigation G97-001
Comparison of Master Station and User Algorithms for Wide-Area Augmentation System G97-023
Covariance Projection Methods for Filters and Smoothers G97-024
Characterization of Ring Laser Gyro Performance Using the Allan Variance Method G97-036
Evaluation of Flat-Earth Approximation Results for Geopotential Missions G97-041

Evaluation of Star Identification Techniques G97-043
Navigation Filter Estimate Fusion for Enhanced Spacecraft Rendezvous G97-054
Terminal Area Navigation Using a Relative Global Positioning System Correction Vector Scheme G97-099
Cycle Ambiguity Estimation for Aircraft Precision Landing Using the Global Positioning System G97-109
Improved Method for Calculating Exact Geodetic Latitude and Altitude G97-129
Relationships Between Positioning Error Measures in Global Positioning System G97-162

Optimization Techniques

μ Controllers: Mixed and Fixed G97-003
Conversion of Optimal Control Problems into Parameter Optimization Problems G97-006
Time-Domain Finite Element Method for Inverse Problem of Aircraft Maneuvers G97-012
Near-Optimal Low-Thrust Trajectories via Micro-Genetic Algorithms G97-030
Integrated Rotor-Flight Control System Optimization with Aeroelastic and Handling Qualities Constraints G97-037
Near-Optimal Guidance Law for Ballistic Missile Interception G97-056
Concatenated Approach to Trajectory Optimization G97-100
Near-Optimal Horizontal Trajectories for Autonomous Air Vehicles G97-116
Near-Optimal Control of Altitude and Path Angle During Aerospace Plane Ascent G97-124
Verifying Robust Time-Optimal Commands for Multimode Flexible Spacecraft G97-132
Trajectory Matching Flight-Path Optimization of Aerospace Vehicles G97-143
Optimal Mass Flexible Tethers for Aerobraking Maneuvers G97-158
Lyapunov Optimal Saturated Control for Nonlinear Systems G97-169
Aircraft Trajectory Optimization in the Horizontal Plane G97-198

Pointing Systems

Attitude Estimation Algorithms for Spinning Satellites Using Global Positioning System Phase Data G97-022
Design Impact of Piezoelectric Actuator Nonlinearities G97-052
More on Gain Adaptive Tracking G97-140
Pointing in Real Euclidean Space G97-145

Redundancy Management

Robustness of a Variable Structure Control System for Maneuverable Flight Vehicles G97-059
Design of Deep Stall Protection for the C-17A G97-120

Signal Processing

Predictive Filtering for Nonlinear Systems G97-089
More on Gain Adaptive Tracking G97-140

Spacecraft Dynamics

Estimation of Vehicle Dynamic and Static Parameters from Magnetometer Data G97-014
Modal Parameter Identification of Controlled Structures G97-025
Slewing Multimode Flexible Spacecraft with Zero Derivative Robustness Constraints G97-033
Articulated, Flexible Multibody Dynamics Modeling: Geostationary Operational Environmental Satellite-8 Case Study G97-045
Slewing Flexible Spacecraft with Deflection-Limiting Input Shaping G97-047
Stability of a Spinning Axisymmetric Rocket with Dissipative Internal Mass Motion G97-049
Gravity Turn Descent with Quadratic Air Drag G97-062
Nonlinear Dynamics of the Tethered Subsatellite System in the Station Keeping Phase G97-066
Annihilation of Transverse Velocity Bias During Spinning-Up Maneuvers G97-068
Feedback Control Law Design for the Dual-Spin Turn of Spacecraft G97-073
Comparison of Analytical Modeling of OEDIPUS Tethers with Data from Tether Laboratory G97-076
Higher-Order Cayley Transforms with Applications to Attitude Representations G97-084
Path Planning for Space Manipulators to Reduce Attitude Disturbances G97-096
Order N Formulation for Flexible Multibody Systems in Tree Topology: Lagrangian Approach G97-107
Geomagnetic Attitude Control of Satellites Using Generalized Multiple Scales G97-110
Feedback Control of Space Robot Attitude by Cyclic Arm Motion G97-113
New Algorithm for Attitude Determination Using Global Positioning System Signals G97-141
Optimal Mass Flexible Tethers for Aerobraking Maneuvers G97-158
Adaptive Nonlinear Attitude Control and Momentum Management of Spacecraft G97-159
ALEXIS Spacecraft Attitude Reconstruction with Thermal/Flexible Motions Due to Launch Damage G97-160
Momentum Transfer Dynamics of a Gyrostat with a Discrete Damper G97-167
Optimal Reorientation Maneuver of Bias Momentum Spacecraft G97-168
Lyapunov Optimal Saturated Control for Nonlinear Systems G97-169
Minimum Model Error Approach for Attitude Estimation G97-190
Dynamical Characteristics of a Tethered Stabilized Satellite G97-197

Spacecraft Guidance and Control

Orbital Maneuvers via Feedback Linearization and Bang–Bang Control G97-013
Active Magnetic Damping Attitude Control for Gravity Gradient Stabilized Spacecraft G97-015
Entry Guidance and Trajectory Control for Reusable Launch Vehicle G97-019
Slewing Multimode Flexible Spacecraft with Zero Derivative Robustness Constraints G97-033
Range-Rate Control Algorithms and Space Rendezvous Schemes G97-034
Evaluation of Star Identification Techniques G97-043
Pole-Placement Technique for Magnetic Momentum Removal of Earth-Pointing Spacecraft G97-044
Strategy for the Passive Maneuvering of Tether-Connected Systems G97-046
Slewing Flexible Spacecraft with Deflection-Limiting Input Shaping G97-047
Analytical Solutions for Exponentially Correlated Acceleration Tracking Filters G97-064
Annihilation of Transverse Velocity Bias During Spinning-Up Maneuvers G97-068
Constrained Steering Law of Pyramid-Type Control Moment Gyros and Ground Tests G97-072
Feedback Control Law Design for the Dual-Spin Turn of Spacecraft G97-073
Optimal Regulation and Passivity Results for Axisymmetric Rigid Bodies Using Two Controls G97-074
Third-Order, Minimal-Parameter Solution of the Orthogonal Matrix Differential Equation G97-082
Predictive Filtering for Attitude Estimation Without Rate Sensors G97-083
Experimental Verification of Vibration Reduction in Flexible Spacecraft Using Input Shaping G97-106
Geomagnetic Attitude Control of Satellites Using Generalized Multiple Scales G97-110
Feedback Control of Space Robot Attitude by Cyclic Arm Motion G97-113
Approximate Optimal Planar Guidance of an Aeroassisted Space Vehicle G97-123
Optimal Low-Earth-Orbit–Geostationary-Earth-Orbit Intermediate Acceleration Orbit Transfer G97-126
Mechanics of Trajectory Optimization Using Nonsingular Variational Equations in Polar Coordinates G97-127
Verifying Robust Time-Optimal Commands for Multimode Flexible Spacecraft G97-132
Improved Pilot Model for Space Shuttle Rendezvous G97-133
Minimum-Time Continuous-Thrust Orbit Transfers Using the Kustaanheimo–Stiefel Transformation G97-134
On-Orbit Robust Control Experiment of Flexible Spacecraft ETS-VI G97-138
Trajectory Optimization Using Nonsingular Orbital Elements and True Longitude G97-156
Autonomous Optical Guidance and Navigation Strategy Around a Small Body G97-157
Adaptive Nonlinear Attitude Control and Momentum Management of Spacecraft G97-159
Optimal Reorientation Maneuver of Bias Momentum Spacecraft G97-168
Lyapunov Optimal Saturated Control for Nonlinear Systems G97-169
Reduced Effort Control Laws for Underactuated Rigid Spacecraft G97-170
Nonlinear Predictive Control of Spacecraft G97-171
Singularities of Nonlinear Attitude Control with Momentum Management G97-192

State Estimation

Unification of Several System Realization Algorithms G97-008
Estimation of Vehicle Dynamic and Static Parameters from Magnetometer Data G97-014
Attitude Estimation Algorithms for Spinning Satellites Using Global Positioning System Phase Data G97-022
Covariance Projection Methods for Filters and Smoothers G97-024
Navigation Filter Estimate Fusion for Enhanced Spacecraft Rendezvous G97-054
Second-Order Correction and Numerical Considerations for the Two-Step Optimal Estimator G97-057
System Realization Using Information Matrix G97-079
Predictive Filtering for Attitude Estimation Without Rate Sensors G97-083
Predictive Filtering for Nonlinear Systems G97-089
Cycle Ambiguity Estimation for Aircraft Precision Landing Using the Global Positioning System G97-109
Frequency-Domain Optimal Estimator for Wing Rock Models G97-118

New Algorithm for Attitude Determination Using Global Positioning System Signals G97-141
ALEXIS Spacecraft Attitude Reconstruction with Thermal/Flexible Motions Due to Launch Damage G97-160
Extension of the Friedland Parameter Estimator to Discrete-Time Systems G97-163
Minimum Model Error Approach for Attitude Estimation G97-190
Aerodynamic Parameter Estimation for High-Performance Aircraft Using Extended Kalman Filtering G97-193

Structural Control

Unification of Several System Realization Algorithms G97-008
Minimum Time Maneuver of Flexible Systems Using Pulse Response Based Control G97-017
Modal Parameter Identification of Controlled Structures G97-025
Conjecture About Orthogonal Functions G97-031
Active Damping of Structures with Guy Cables G97-051
Closed-Loop Pole Design for Vibration Suppression G97-053
Fuel/Time Optimal Control of Spacecraft Maneuvers G97-063
Nonlinear Control of a Proof-Mass Actuator G97-075
Piezoelectric Stack Actuators and Control System Design: Strategies and Pitfalls G97-077
Experimental Comparison of Robust $\mathcal{H}_2$ Control Techniques for Uncertain Structural Systems G97-097
Integral Relations for Disturbance Isolation G97-098
Design of Constant Gain Dissipative Controllers for Eigensystem Assignment in Passive Systems G97-105
New Discrete-Time, Fuzzy-Sliding-Mode Control with Application to Smart Structures G97-137
Analysis of the Frequency, Damping, and Total Insensitivities of Input Shaping Designs G97-144
Improved Eigenstructure Assignment Controller Design Using a Substructure-Based Coordinate System G97-148
Simultaneous Structural/Control Optimum Design of Composite Plate with Piezoelectric Actuators G97-173

System Identification

Adaptive Filters for Real-Time System Identification and Control G97-007
Unification of Several System Realization Algorithms G97-008
Accuracy of Aerodynamic Model Parameters Estimated from Flight Test Data G97-009
On-Line Version of the Eigensystem Realization Algorithm Using Data Correlations G97-018
Modal Parameter Identification of Controlled Structures G97-025
Explicit Method for Parameter Identification G97-078
System Realization Using Information Matrix G97-079
Estimation of Structural Response Using Remote Sensor Locations G97-080
Extension of the Friedland Parameter Estimator to Discrete-Time Systems G97-163
Nonlinear Viscoelastic-Plastic Mechanisms-Based Model of an Electrorheological Damper G97-175
Singularities of Nonlinear Attitude Control with Momentum Management G97-192
Aerodynamic Parameter Estimation for High-Performance Aircraft Using Extended Kalman Filtering G97-193
Identification of Linear Model Parameters and Uncertainties for an Aircraft Turbofan-Engine G97-199

Trajectory Optimization

Time-Domain Finite Element Method for Inverse Problem of Aircraft Maneuvers G97-012
Orbital Maneuvers via Feedback Linearization and Bang–Bang Control G97-013
Entry Guidance and Trajectory Control for Reusable Launch Vehicle G97-019
Near-Optimal Low-Thrust Trajectories via Micro-Genetic Algorithms G97-030
Optimal Earth–Moon Trajectories Using Nuclear Electric Propulsion G97-040
Optimal Earth–Moon Trajectories Using Combined Chemical–Electric Propulsion G97-042
Extremal Angle of Attack over a Singular Thrust Arc in Rocket Flight G97-061
Optimal Steering for North–South Stationkeeping of Geostationary Spacecraft G97-071
Output Tracking with Nonhyperbolic and Near Nonhyperbolic Internal Dynamics: Helicopter Hover Control G97-090
Suboptimal Singular Orbital Transfer G97-094
Path Planning for Space Manipulators to Reduce Attitude Disturbances G97-096
Concatenated Approach to Trajectory Optimization G97-100
Near-Optimal Horizontal Trajectories for Autonomous Air Vehicles G97-116
Approximate Optimal Planar Guidance of an Aeroassisted Space Vehicle G97-123
Optimal Low-Earth-Orbit–Geostationary-Earth-Orbit Intermediate Acceleration Orbit Transfer G97-126
Mechanics of Trajectory Optimization Using Nonsingular Variational Equations in Polar Coordinates G97-127
Trajectory Matching Flight-Path Optimization of Aerospace Vehicles G97-143
Reformulation of Edelbaum's Low-Thrust Transfer Problem Using Optimal Control Theory G97-154
Optimal Low-Thrust Interception of Earth-Crossing Asteroids G97-155
Trajectory Optimization Using Nonsingular Orbital Elements and True Longitude G97-156
Evaluation of Practical Solutions for Onboard Aircraft Four-Dimensional Guidance G97-165
Global Minimum Mass for Aerobraking Tethers G97-194
Aircraft Trajectory Optimization in the Horizontal Plane G97-198

Interdisciplinary Topics

Analytical and Numerical Methods

Bifurcation of Self-Excited Rigid Bodies Subjected to Small Perturbation Torques G97-016
Optimized TRIAD Algorithm for Attitude Determination G97-035
n-Dimensional Cross Product and Its Application to Matrix Eigenanalysis G97-081
Third-Order, Minimal-Parameter Solution of the Orthogonal Matrix Differential Equation G97-082
Improved Method for Calculating Exact Geodetic Latitude and Altitude G97-129

Safety

Flight-Test Results of Propulsion-Only Emergency Control System on MD-11 Airplane G97-153

Sensor Systems

Characterization of Ring Laser Gyro Performance Using the Allan Variance Method G97-036

Launch Vehicle and Missile (LV/M) Technology

Missile Systems

Adaptive Robust Bank-to-Turn Missile Autopilot Design Using Neural Networks G97-055
Stochastic Analysis of the Interception of Maneuvering Antisurface Missiles G97-112

Trajectories and Tracking Systems

Applications of Canonical Transformations in Optimizing Orbital Transfers G97-122

Space Technology

Aerobraking Configurations/ Aerothermodynamics

Global Minimum Mass for Aerobraking Tethers G97-194

Aerobraking Flight Mechanics

Extremal Angle of Attack over a Singular Thrust Arc in Rocket Flight G97-061
Planar Aeroassisted Attainability Domain G97-069
Approximate Optimal Planar Guidance of an Aeroassisted Space Vehicle G97-123

Humans in Space/Life Support Systems, EVA

Improved Pilot Model for Space Shuttle Rendezvous G97-133

Landers

Gravity Turn Descent with Quadratic Air Drag G97-062

Mission Design and Analysis

Strategy for the Passive Maneuvering of Tether-Connected Systems G97-046
V_∞ Leveraging for Interplanetary Missions: Multiple-Revolution Orbit Techniques G97-067
Low-Thrust Orbit Raising with Coupled Plane Change and J_2 Precession G97-095
Postlaunch Contingency Trajectories for the Near-Earth Asteroid Rendezvous Mission G97-128
Autonomous Optical Guidance and Navigation Strategy Around a Small Body G97-157

Mission Trajectories (Earth and Interplanetary)

Gravity Turn Descent with Quadratic Air Drag G97-062
V_∞ Leveraging for Interplanetary Missions: Multiple-Revolution Orbit Techniques G97-067
Suboptimal Singular Orbital Transfer G97-094
Low-Thrust Orbit Raising with Coupled Plane Change and J_2 Precession G97-095
Close-Approach Trajectories in the Elliptic Restricted Problem G97-125
Postlaunch Contingency Trajectories for the Near-Earth Asteroid Rendezvous Mission G97-128
Improved Method for Calculating Exact Geodetic Latitude and Altitude G97-129

Optimal Low-Thrust Interception of Earth-Crossing Asteroids G97-155
Global Minimum Mass for Aerobraking Tethers G97-194

Space Experiments

Evaluation of Flat-Earth Approximation Results for Geopotential Missions G97-041
Development of Structural Uncertainty Models G97-135
On-Orbit Robust Control Experiment of Flexible Spacecraft ETS-VI G97-138

Space Systems

Path Planning for Space Manipulators to Reduce Attitude Disturbances G97-096
Optimal Mass Flexible Tethers for Aerobraking Maneuvers G97-158

Spacecraft Attitude Determination

Estimation of Vehicle Dynamic and Static Parameters from Magnetometer Data G97-014
Attitude Estimation Algorithms for Spinning Satellites Using Global Positioning System Phase Data G97-022
Noetherian Perspective of Eulerian Motion of a Free Rigid Body G97-029
Optimized TRIAD Algorithm for Attitude Determination G97-035
Third-Order, Minimal-Parameter Solution of the Orthogonal Matrix Differential Equation G97-082
Predictive Filtering for Attitude Estimation Without Rate Sensors G97-083
Higher-Order Cayley Transforms with Applications to Attitude Representations G97-084
New Procedure for Deriving Optimized Strapdown Attitude Algorithms G97-108
New Results for an Asymmetric Rigid Body with Constant Body-Fixed Torques G97-139
New Algorithm for Attitude Determination Using Global Positioning System Signals G97-141
Pointing in Real Euclidean Space G97-145
ALEXIS Spacecraft Attitude Reconstruction with Thermal/Flexible Motions Due to Launch Damage G97-160
Stability Analysis on Earth Observing System AM-1 Spacecraft Attitude Determination G97-161
Minimum Model Error Approach for Attitude Estimation G97-190

Spacecraft Data Sensing, Processing, and Transmission

Navigation Filter Estimate Fusion for Enhanced Spacecraft Rendezvous G97-054

Spacecraft Sensor Systems

Characterization of Ring Laser Gyro Performance Using the Allan Variance Method G97-036

Spacecraft Structural Configuration, Design, and Analysis

Integral Relations for Disturbance Isolation G97-098

Structural Mechanics and Materials

Aeroelasticity and Control

Robust Flutter Margins of an F/A-18 Aircraft from Aeroelastic Flight Data G97-093
Two-Dimensional Active Wing/Store Flutter Suppression Using $\mathcal{H}_\infty$ Theory G97-149
Nonlinear Control of a Prototypical Wing Section with Torsional Nonlinearity G97-182
Adaptive Control of Aeroelastic Instabilities in Transonic Flow and Its Scaling G97-183

Dynamic Model Analysis

Bifurcation of Self-Excited Rigid Bodies Subjected to Small Perturbation Torques G97-016
Comparison of Inverse Modification Techniques for Some Gyroscopic Systems G97-048
Order N Formulation for Flexible Multibody Systems in Tree Topology: Lagrangian Approach G97-107
Momentum Transfer Dynamics of a Gyrostat with a Discrete Damper G97-167
Adaptive Control of Aeroelastic Instabilities in Transonic Flow and Its Scaling G97-183

Flexible and Active Structures

Adaptive Filters for Real-Time System Identification and Control G97-007
Minimum Time Maneuver of Flexible Systems Using Pulse Response Based Control G97-017
Slewing Multimode Flexible Spacecraft with Zero Derivative Robustness Constraints G97-033
Articulated, Flexible Multibody Dynamics Modeling: Geostationary Operational Environmental Satellite-8 Case Study G97-045
Slewing Flexible Spacecraft with Deflection-Limiting Input Shaping G97-047
Active Damping of Structures with Guy Cables G97-051
Design Impact of Piezoelectric Actuator Nonlinearities G97-052
Nonlinear Control of a Proof-Mass Actuator G97-075
Comparison of Analytical Modeling of OEDIPUS Tethers with Data from Tether Laboratory G97-076
Estimation of Structural Response Using Remote Sensor Locations G97-080
Experimental Comparison of Robust $\mathcal{H}_2$ Control Techniques for Uncertain Structural Systems G97-097
Integral Relations for Disturbance Isolation G97-098
Development of Structural Uncertainty Models G97-135
New Discrete-Time, Fuzzy-Sliding-Mode Control with Application to Smart Structures G97-137
Analysis of the Frequency, Damping, and Total Insensitivities of Input Shaping Designs G97-144
Improved Eigenstructure Assignment Controller Design Using a Substructure-Based Coordinate System G97-148
Simultaneous Structural/Control Optimum Design of Composite Plate with Piezoelectric Actuators G97-173
Induced Oscillations of a Finite Plate G97-181

Structural Dynamics and Characterization

On-Line Version of the Eigensystem Realization Algorithm Using Data Correlations G97-018
Estimation of Structural Response Using Remote Sensor Locations G97-080
Development of Structural Uncertainty Models G97-135
Nonlinear Control of a Prototypical Wing Section with Torsional Nonlinearity G97-182

Structural Modeling

System Realization Using Information Matrix G97-079
Modeling Fluid–Structure Interaction G97-187

Structural Optimization

Simultaneous Structural/Control Optimum Design of Composite Plate with Piezoelectric Actuators G97-173

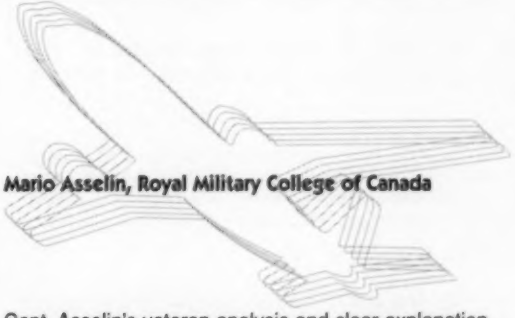
Introduction to Aircraft Performance



Mario Asselin, Royal Military College of Canada

Designed for aerospace engineering students, government agencies responsible for certifying military and civilian aircraft, and individuals involved in aircraft accident investigation and consulting, *Introduction to Aircraft Performance* provides a comprehensive and useful approach to aircraft performance issues. In addition to covering the broad area of performance, this book also examines specialized subjects such as the Ground Proximity Warning System and ice formation on the aircraft while on the ground or in flight.

Capt. Asselin's veteran analysis and clear explanation of aircraft performance issues have already found their way into many university classrooms, including those of the Royal Military College of Canada, and have proved essential for those practicing engineers and individuals who can use his book for its practical applications.

CA and VA residents add applicable sales tax. For shipping and handling add $4.75 for 1–4 books (call for rates for higher quantities). All individual orders, including U.S., Canadian, and foreign, must be prepaid by personal or company check, traveler's check, international money order, or credit card (VISA, MasterCard, American Express, or Diners Club). All checks must be made payable to AIAA in U.S. dollars, drawn on a U.S. bank. Orders from libraries, corporations, government agencies, and university and college bookstores must be accompanied by an authorized purchase order. All other bookstore orders must be prepaid. Please allow 4 weeks for delivery. Prices are subject to change without notice. Returns in sellable condition will be accepted within 30 days. Sorry, we can not accept returns of case studies, conference proceedings, sale items, or software (unless defective). Non-U.S. residents are responsible for payment of any taxes required by their government.

Chronological Index

G97-001 Origins, Evolution, and Future of Satellite Navigation. Bradford W. Parkinson, *Stanford University* (**20**, 1, p. 11) Article based on AIAA Paper 96-0002

G97-002 Nonlinear Flight Control Using Neural Networks. Byoung S. Kim and Anthony J. Calise, *Georgia Institute of Technology* (**20**, 1, p. 26) Article based on AIAA Paper 94-3646 CP948

G97-003 μ Controllers: Mixed and Fixed. Harald Buschek and Anthony J. Calise, *Georgia Institute of Technology* (**20**, 1, p. 34) Article based on AIAA Paper 95-3238 CP957

G97-004 Uncertainty Modeling and Fixed-Order Controller Design for a Hypersonic Vehicle Model. Harald Buschek and Anthony J. Calise, *Georgia Institute of Technology* (**20**, 1, p. 42) Article based on AIAA Paper 95-6062

G97-005 Flight Control Applications of l_1 Optimization. Mark Spillman and D. Brett Ridgely, *Air Force Institute of Technology* (**20**, 1, p. 49) Article

G97-006 Conversion of Optimal Control Problems into Parameter Optimization Problems. David G. Hull, *University of Texas at Austin* (**20**, 1, p. 57) Article based on AIAA Paper 96-3812

G97-007 Adaptive Filters for Real-Time System Identification and Control. Tae W. Lim, *University of Kansas*; Albert Bosse, *Swales and Associates, Inc.*; Shalom Fisher, *U.S. Naval Research Laboratory* (**20**, 1, p. 61) Article

G97-008 Unification of Several System Realization Algorithms. Jer-Nan Juang, *NASA Langley Research Center* (**20**, 1, p. 67) Article

G97-009 Accuracy of Aerodynamic Model Parameters Estimated from Flight Test Data. Eugene A. Morelli, *Lockheed Martin Engineering and Sciences Company*; Vladislav Klein, *George Washington University and NASA Langley Research Center* (**20**, 1, p. 74) Article

G97-010 Pilot-Induced Oscillation Analysis and Prediction with Actuator Rate Limiting. David H. Klyde, Duane T. McRuer, and Thomas T. Myers, *Systems Technology, Inc.* (**20**, 1, p. 81) Article based on AIAA Paper 96-3433 CP967

G97-011 Flight Control System Design with Rate Saturating Actuators. R. A. Hess and S. A. Snell, *University of California, Davis* (**20**, 1, p. 90) Article

G97-012 Time-Domain Finite Element Method for Inverse Problem of Aircraft Maneuvers. Suchang Lee and Youdan Kim, *Seoul National University, Korea* (**20**, 1, p. 97) Article based on AIAA Paper 96-3701

G97-013 Orbital Maneuvers via Feedback Linearization and Bang–Bang Control. Sanguk Lee, *Electronics and Telecommunications Research Institute, Korea*; J. E. Cochran Jr., *Auburn University* (**20**, 1, p. 104) Article based on AIAA Paper 94-3749

G97-014 Estimation of Vehicle Dynamic and Static Parameters from Magnetometer Data. John F. Kinkel and Mitchell Thomas, *L'Garde, Inc.* (**20**, 1, p. 111) Article

G97-015 Active Magnetic Damping Attitude Control for Gravity Gradient Stabilized Spacecraft. Carlo Arduini and Paolo Baiocco, *University of Rome "La Sapienza," Italy* (**20**, 1, p. 117) Article

G97-016 Bifurcation of Self-Excited Rigid Bodies Subjected to Small Perturbation Torques. X. Tong, *National Research Council, Canada*; B. Tabarrok, *University of Victoria, Canada* (**20**, 1, p. 123) Article

G97-017 Minimum Time Maneuver of Flexible Systems Using Pulse Response Based Control. Jeffrey K. Bennighof and Murugan Subramaniam, *University of Texas at Austin* (**20**, 1, p. 129) Article

G97-018 On-Line Version of the Eigensystem Realization Algorithm Using Data Correlations. J. E. Cooper, *University of Manchester, England, UK* (**20**, 1, p. 137) Article

G97-019 Entry Guidance and Trajectory Control for Reusable Launch Vehicle. Ping Lu, *Iowa State University* (**20**, 1, p. 143) Article

G97-020 Missile Autopilot Design Using a New Linear Time-Varying Control Technique. J. Jim Zhu and M. Christopher Mickle, *Louisiana State University* (**20**, 1, p. 150) Article

G97-021 Optimal Guidance with Reduced Sensitivity to Time-to-Go Estimation Errors. J. Z. Ben-Asher and I. Yaesh, *Israel Military Industries* (**20**, 1, p. 158) Article

G97-022 Attitude Estimation Algorithms for Spinning Satellites Using Global Positioning System Phase Data. Penina Axelrad and Charles P. Behre, *University of Colorado* (**20**, 1, p. 164) Article

G97-023 Comparison of Master Station and User Algorithms for Wide-Area Augmentation System. Changdon Kee, Todd Walter, Yi-chung Chao, Yeou-Jyh Tsai, Per Enge, and Bradford W. Parkinson, *Stanford University* (**20**, 1, p. 170) Article

G97-024 Covariance Projection Methods for Filters and Smoothers. Stephen R. McReynolds, *Lockheed Martin Corporation* (**20**, 1, p. 177) Article based on AIAA Paper 96-3739

G97-025 Modal Parameter Identification of Controlled Structures. Tokio Kasai, Keiji Komatsu, and Masa Sano, *National Aerospace Laboratory, Japan* (**20**, 1, p. 184) Engineering Note

G97-026 Pilot Prefilter Design via H_∞ Model-Matching Approach. Ciann-Dong Yang, *National Cheng Kung University, Taiwan, ROC*; and Jim Ouyang and Hann-Shing Ju, *Aeronautic Research Laboratory, Taiwan, ROC* (**20**, 1, p. 186) Engineering Note

G97-027 Flight Control System Design by Self-Organizing Fuzzy Logic Controller. Chih-Min Lin and Jiann-Hwa Maa, *Yuan-Ze Institute of Technology, Taiwan, ROC* (**20**, 1, p. 189) Engineering Note

G97-028 Minimum Drag Control Allocation. Wayne C. Durham, John C. Bolling, and Kenneth A. Bordignon, *Virginia Polytechnic Institute and State University* (**20**, 1, p. 190) Engineering Note

G97-029 Noetherian Perspective of Eulerian Motion of a Free Rigid Body. Yoshihiko Nakamura, *University of Tokyo, Japan*; and Ranjan Mukherjee, *Michigan State University* (**20**, 1, p. 193) Engineering Note

G97-030 Near-Optimal Low-Thrust Trajectories via Micro-Genetic Algorithms. Victoria Coverstone-Carroll, *University of Illinois at Urbana–Champaign* (**20**, 1, p. 196) Engineering Note

G97-031 Conjecture About Orthogonal Functions. Larry Silverberg, *North Carolina State University* (**20**, 1, p. 198) Engineering Note

G97-032 Disturbance Rejection Approach to Actuator and Sensor Placement. K. B. Lim, *NASA Langley Research Center* (**20**, 1, p. 202) Engineering Note

G97-033 Slewing Multimode Flexible Spacecraft with Zero Derivative Robustness Constraints. William E. Singhose, *Massachusetts Institute of Technology*; Lucy Y. Pao, *University of Colorado*; and Warren P. Seering, *Massachusetts Institute of Technology* (**20**, 1, p. 204) Engineering Note based on AIAA Paper 96-3845

G97-034 Range-Rate Control Algorithms and Space Rendezvous Schemes. Shao-Hua Yu, *Academia Sinica, PRC* (**20**, 1, p. 206) Engineering Note

G97-035 Optimized TRIAD Algorithm for Attitude Determination. Itzhack Y. Bar-Itzhack and Richard R. Harman, *NASA Goddard Space Flight Center* (**20**, 1, p. 208) Engineering Note based on AIAA Paper 96-3616 CP969

G97-036 Characterization of Ring Laser Gyro Performance Using the Allan Variance Method. Lawrence C. Ng, *Lawrence Livermore National Laboratory*; and Darryll J. Pines, *University of Maryland* (**20**, 1, p. 211) Engineering Note

G97-037 Integrated Rotor-Flight Control System Optimization with Aeroelastic and Handling Qualities Constraints. Vineet Sahasrabudhe, Roberto Celi, and André L. Tits, *University of Maryland* (**20**, 2, p. 217) Article

G97-038 Parameter Varying Control of a High-Performance Aircraft. Jean-Marc Biannic and Pierre Apkarian, *Centre d'Etudes et de Recherches de Toulouse, France*; and William L. Garrard, *University of Minnesota* (**20**, 2, p. 225) Article based on AIAA Paper 96-3807

G97-039 Trajectory Synthesis for Air Traffic Automation. Rhonda Slattery, *NASA Ames Research Center*; and Yiyuan Zhao, *University of Minnesota* (**20**, 2, p. 232) Article

G97-040 Optimal Earth–Moon Trajectories Using Nuclear Electric Propulsion. Craig A. Kluever, *University of Missouri–Columbia/Kansas City*; and Bion L. Pierson, *Iowa State University* (**20**, 2, p. 239) Article

G97-041 Evaluation of Flat-Earth Approximation Results for Geopotential Missions. Mark B. Tapley, *Stanford University* (**20**, 2, p. 246) Article

G97-042 Optimal Earth–Moon Trajectories Using Combined Chemical–Electric Propulsion. Craig A. Kluever, *University of Missouri–Columbia/Kansas City* (**20**, 2, p. 253) Article based on AIAA Paper 96-3650 CP964

G97-043 Evaluation of Star Identification Techniques. Curtis Padgett, *Jet Propulsion Laboratory, California Institute of Technology*; Kenneth Kreutz-Delgado, *University of California, San Diego*; and Suraphol Udomkesmalee, *Jet Propulsion Laboratory, California Institute of Technology* (**20**, 2, p. 259) Article

G97-044 Pole-Placement Technique for Magnetic Momentum Removal of Earth-Pointing Spacecraft. Hari B. Hablani, *Rockwell International Corporation* (**20**, 2, p. 268) Article

G97-045 Articulated, Flexible Multibody Dynamics Modeling: Geostationary Operational Environmental Satellite-8 Case Study. Sivakumar S. K. Tadikonda, *McDonnell Douglas Aerospace* (**20**, 2, p. 276) Article based on AIAA Paper 96-3887

G97-046 Strategy for the Passive Maneuvering of Tether-Connected Systems. Shi-Sheng Chu and Li-Sheng Wang, *National Taiwan University, Taiwan, ROC* (**20**, 2, p. 284) Article

G97-047 Slewing Flexible Spacecraft with Deflection-Limiting Input Shaping. William E. Singhose, *Massachusetts Institute of Technology*; Arun K. Banerjee, *Lockheed Palo Alto Research Laboratory*; and Warren P. Seering, *Massachusetts Institute of Technology* (**20**, 2, p. 291) Article

G97-048 Comparison of Inverse Modification Techniques for Some Gyroscopic Systems. Jifang Tian and Stanley G. Hutton, *University of British Columbia, Canada* (**20**, 2, p. 299) Article

G97-049 Stability of a Spinning Axisymmetric Rocket with Dissipative Internal Mass Motion. Y. Yam, *Chinese University of Hong Kong*; D. L. Mingori, *University of California, Los Angeles*; and D. M. Halsmer, *Oral Roberts University* (**20**, 2, p. 306) Article

G97-050 Control/Structure Integrated Design for Flexible Spacecraft Undergoing On-Orbit Maneuvers. R. I. Oliver, *BHP Information Technology, Australia*; and S. F. Asokanthan, *University of Queensland, Australia* (**20**, 2, p. 313) Article

G97-051 Active Damping of Structures with Guy Cables. A. Preumont and Y. Achkire, *Free University of Brussels, Belgium* (**20**, 2, p. 320) Article

G97-052 Design Impact of Piezoelectric Actuator Nonlinearities. John A. Main and Ephrahim Garcia, *Vanderbilt University* (**20**, 2, p. 327) Article

G97-053 Closed-Loop Pole Design for Vibration Suppression. Michael Papadopoulos and Ephrahim Garcia, *Vanderbilt University* (**20**, 2, p. 333) Article

G97-054 Navigation Filter Estimate Fusion for Enhanced Spacecraft Rendezvous. J. Russell Carpenter, *NASA Johnson Space Center*; and Robert H. Bishop, *University of Texas at Austin* (**20**, 2, p. 338) Article based on AIAA Paper 94-3548 CP948

G97-055 Adaptive Robust Bank-to-Turn Missile Autopilot De-

sign Using Neural Networks. Li-Chen Fu, Wei-Der Chang, Jung-Hua Yang, and Te-Son Kuo, *National Taiwan University, Taiwan, ROC* (**20**, 2, p. 346) Article

G97-056 Near-Optimal Guidance Law for Ballistic Missile Interception. John J. Dougherty, *TRW Systems Integration Group*; and Jason L. Speyer, *University of California, Los Angeles* (**20**, 2, p. 355) Article

G97-057 Second-Order Correction and Numerical Considerations for the Two-Step Optimal Estimator. N. Jeremy Kasdin and Gordon T. Haupt, *Stanford University* (**20**, 2, p. 362) Article

G97-058 Minimax Optimal Control Analysis of Lateral Escape Maneuvers for Microburst Encounters. H. G. Visser, *Delft University of Technology, The Netherlands* (**20**, 2, p. 370) Article based on AIAA Paper 96-3374 CP967

G97-059 Robustness of a Variable Structure Control System for Maneuverable Flight Vehicles. Mario Innocenti, *University of Pisa, Italy*; and Ajay Thukral, *Tuskegee University* (**20**, 2, p. 377) Article

G97-060 Limitations of Decentralized Control. John D. Schierman and David K. Schmidt, *University of Maryland* (**20**, 2, p. 384) Article

G97-061 Extremal Angle of Attack over a Singular Thrust Arc in Rocket Flight. I. Michael Ross, *U.S. Naval Postgraduate School* (**20**, 2, p. 391) Engineering Note

G97-062 Gravity Turn Descent with Quadratic Air Drag. Colin R. McInnes, *University of Glasgow, Scotland, UK* (**20**, 2, p. 393) Engineering Note

G97-063 Fuel/Time Optimal Control of Spacecraft Maneuvers. Shin-Whar Liu and Tarunraj Singh, *State University of New York at Buffalo* (**20**, 2, p. 394) Engineering Note

G97-064 Analytical Solutions for Exponentially Correlated Acceleration Tracking Filters. Seong Dae Sagong, *Youngdong Institute of Technology, Korea* (**20**, 2, p. 397) Engineering Note

G97-065 Robust Controller Design with Damping and Stability Specifications. Horng-Giou Chen, *Chung-Shan Institute of Science and Technology, Taiwan, ROC*; and Kuang-Wei Han, *Yuan-Ze Institute of Technology, Taiwan, ROC* (**20**, 2, p. 400) Engineering Note

G97-094 Suboptimal Singular Orbital Transfer. I. Michael Ross, *U.S. Naval Postgraduate School* (**20**, 3, p. 605) Engineering Note

G97-095 Low-Thrust Orbit Raising with Coupled Plane Change and J_2 Precession. Colin R. McInnes, *University of Glasgow, Scotland, UK* (**20**, 3, p. 607) Engineering Note

G97-096 Path Planning for Space Manipulators to Reduce Attitude Disturbances. Hiroshi Okubo, Nobuo Nagano, Nobuo Komatsu, and Toshihiro Tsumura, *Osaka Prefecture University, Japan* (**20**, 3, p. 609) Engineering Note based on AIAA Paper 95-3338 CP957

G97-097 Experimental Comparison of Robust $\mathcal{H}_2$ Control Techniques for Uncertain Structural Systems. Simon C. O. Grocott, Jonathan P. How, and David W. Miller, *Massachusetts Institute of Technology* (**20**, 3, p. 611) Engineering Note

G97-098 Integral Relations for Disturbance Isolation. Boris J. Lurie, *Jet Propulsion Laboratory, California Institute of Technology* (**20**, 3, p. 614) Engineering Note

G97-099 Terminal Area Navigation Using a Relative Global Positioning System Correction Vector Scheme. Jerome Krempasky, *Hughes Missile Systems Company* (**20**, 3, p. 615) Engineering Note based on AIAA Paper 96-3816

G97-100 Concatenated Approach to Trajectory Optimization. Hans Seywald and Renjith R. Kumar, *Analytical Mechanics Associates, Inc.* (**20**, 3, p. 617) Engineering Note

G97-101 Life-Extending Control of Reusable Rocket Engines. Michael Holmes, Sekhar Tangirala, and Asok Ray, *Pennsylvania State University* (**20**, 3, p. 621) Engineering Note

G97-102 Mass Property Estimation Using Coasting Maneuvers. Sergei Tanygin and Trevor Williams, *University of Cincinnati* (**20**, 4, p. 625) Article

G97-103 Separation Dynamics of Strap-On Boosters in the Atmosphere. Rajeev Lochan and V. Adimurthy, *Vikram Sarabhai Space Center, India*; and K. Kumar, *Indian Institute of Technology* (**20**, 4, p. 633) Article

G97-104 Numerically Efficient Robustness Analysis of Trajectory Tracking for Nonlinear Systems. Jorge E. Tierno, *Honeywell Technology Center*; Richard M. Murray and John C. Doyle, *California Institute of Technology*; and Irene M. Gregory, *NASA Langley Research Center* (**20**, 4, p. 640) Article

G97-105 Design of Constant Gain Dissipative Controllers for Eigensystem Assignment in Passive Systems. Peiman G. Maghami, *NASA Langley Research Center*; and Sandeep Gupta, *Hughes Space and Communications Company* (**20**, 4, p. 648) Article

G97-106 Experimental Verification of Vibration Reduction in Flexible Spacecraft Using Input Shaping. Timothy D. Tuttle and Warren P. Seering, *Massachusetts Institute of Technology* (**20**, 4, p. 658) Article

G97-107 Order N Formulation for Flexible Multibody Systems in Tree Topology: Lagrangian Approach. S. Pradhan and V. J. Modi, *University of British Columbia, Canada*; and A. K. Misra, *McGill University, Canada* (**20**, 4, p. 665) Article

G97-108 New Procedure for Deriving Optimized Strapdown Attitude Algorithms. V. Z. Gusinsky, V. M. Lesyuchevsky, and Yu. A. Litmanovich, *Central Scientific and Research Institute "Elektropribor," Russia*; and Howard Musoff and George T. Schmidt, *Charles Stark Draper Laboratory, Inc.* (**20**, 4, p. 673) Article

G97-109 Cycle Ambiguity Estimation for Aircraft Precision Landing Using the Global Positioning System. Boris S. Pervan and Bradford W. Parkinson, *Stanford University* (**20**, 4, p. 681) Article

G97-110 Geomagnetic Attitude Control of Satellites Using Generalized Multiple Scales. Tiauw Hiong Go and Rudrapatna V. Ramnath, *Massachusetts Institute of Technology* (**20**, 4, p. 690) Article

G97-111 Mixed H_2/H_∞ Method Suitable for Gain Scheduled Aircraft Control. Shyh-Pyng Shue, M. E. Sawan, and Kamran Rokhsaz, *Wichita State University* (**20**, 4, p. 699) Article

G97-112 Stochastic Analysis of the Interception of Maneuvering Antisurface Missiles. Y. Lipman, J. Shinar, and Y. Oshman, *Technion—Israel Institute of Technology* (**20**, 4, p. 707) Article based on AIAA Paper 96-3881

G97-113 Feedback Control of Space Robot Attitude by Cyclic Arm Motion. Katsuhiko Yamada and Shoji Yoshikawa, *Mitsubishi Electric Corporation, Japan* (**20**, 4, p. 715) Article

G97-114 Digital Modeling and Digital Redesign of Analog Uncertain Systems Using Genetic Algorithms. Leang-San Shieh, Jingbo Zheng, and Weimin Wang, *University of Houston* (**20**, 4, p. 721) Article

G97-115 Maneuvering Flight Control with Actuator Constraints. R. B. Miller and M. Pachter, *U.S. Air Force Institute of Technology* (**20**, 4, p. 729) Article

G97-116 Near-Optimal Horizontal Trajectories for Autonomous Air Vehicles. Ilana Shapira and Joseph Z. Ben-Asher, *Tel-Aviv University, Israel* (**20**, 4, p. 735) Article

G97-117 Numerical Approach to Inverse Flight Dynamics. Marco Borri, Carlo L. Bottasso, and Fabio Montelaghi, *Politecnico di Milano, Italy* (**20**, 4, p. 742) Article

G97-118 Frequency-Domain Optimal Estimator for Wing Rock Models. Szu-Ying Tan, *Aeronautical Research Laboratory, Taiwan, ROC*; and C. Edward Lan, *University of Kansas* (**20**, 4, p. 748) Article

G97-119 Bifurcation Analysis of a Highly Augmented Aircraft Model. Giulio Avanzini, *University of Rome "La Sapienza," Italy*; and Guido de Matteis, *Polytechnic of Turin, Italy* (**20**, 4, p. 754) Article based on AIAA Paper 96-3367 CP967

G97-120 Design of Deep Stall Protection for the C-17A. Obi I. Iloputaife, *McDonnell Douglas Aerospace* (**20**, 4, p. 760) Article based on AIAA Paper 96-3784

G97-121 Prototype Conflict Alerting System for Free Flight. Lee C. Yang and James K. Kuchar, *Massachusetts Institute of Technology* (**20**, 4, p. 768) Article based on AIAA Paper 97-0220

G97-122 Applications of Canonical Transformations in Optimizing Orbital Transfers. Mihai Popescu, *Institute of Applied Mathematics, Romanian Academy of Sciences* (**20**, 4, p. 774) Article

G97-123 Approximate Optimal Planar Guidance of an Aeroassisted Space Vehicle. David Mishne, *RAFAEL, Ministry of Defense, Israel*; and Moshe Idan and Yaacov Laufer, *Technion—Israel Institute of Technology* (**20**, 4, p. 780) Article

G97-124 Near-Optimal Control of Altitude and Path Angle During Aerospace Plane Ascent. Jean-Paul Kremer, *Princeton University*; and Kenneth D. Mease, *University of California, Irvine* (**20**, 4, p. 789) Article based on AIAA Papers 94-3634 and 95-3329 CP948 and 957

G97-125 Close-Approach Trajectories in the Elliptic Restricted Problem. Antonio Fernando Bertachini de Almeida Prado, *Instituto Nacional de Pesquisas Espaciais, Brazil* (**20**, 4, p. 797) Article

G97-126 Optimal Low-Earth-Orbit–Geostationary-Earth-Orbit Intermediate Acceleration Orbit Transfer. Jean Albert Kechichian, *The Aerospace Corporation* (**20**, 4, p. 803) Article

G97-127 Mechanics of Trajectory Optimization Using Nonsingular Variational Equations in Polar Coordinates. Jean Albert Kechichian, *The Aerospace Corporation* (**20**, 4, p. 812) Article

G97-128 Postlaunch Contingency Trajectories for the Near-Earth Asteroid Rendezvous Mission. Jim V. McAdams, *Applied Physics Laboratory, Johns Hopkins University* (**20**, 4, p. 819) Article based on AIAA Paper 96-3578 CP969

G97-129 Improved Method for Calculating Exact Geodetic Latitude and Altitude. Isaac Sofair, *U.S. Naval Surface Warfare Center* (**20**, 4, p. 824) Engineering Note

G97-130 Controller Reduction Using Normal Coordinates of Reconstruction Error Matrix and Component Cost Analysis Method. E. Nissim, *Technion—Israel Institute of Technology* (**20**, 4, p. 826) Engineering Note

G97-131 Approximations for Quantitative Feedback Theory Designs. D. K. Henderson and R. A. Hess, *University of California, Davis* (**20**, 4, p. 828) Engineering Note

G97-132 Verifying Robust Time-Optimal Commands for Multimode Flexible Spacecraft. Lucy Y. Pao, *University of Colorado*; and William E. Singhose, *Massachusetts Institute of Technology* (**20**, 4, p. 831) Engineering Note based on AIAA Paper 96-3845

G97-133 Improved Pilot Model for Space Shuttle Rendezvous. Robert B. Brown, *U.S. Air Force Academy* (**20**, 4, p. 833) Engineering Note based on AIAA Paper 96-3848

G97-134 Minimum-Time Continuous-Thrust Orbit Transfers Using the Kustaanheimo–Stiefel Transformation. James D. Thorne and Christopher D. Hall, *U.S. Air Force Institute of Technology* (**20**, 4, p. 836) Engineering Note

G97-135 Development of Structural Uncertainty Models. Mark E. Campbell and Edward F. Crawley, *Massachusetts Institute of Technology* (**20**, 5, p. 841) Article

G97-136 Actuator and Exciter Placement for Flexible Structures. Hyoun-Surk Roh and Youngjin Park, *Korea Advanced Institute of Science and Technology* (**20**, 5, p. 850) Article

G97-137 New Discrete-Time, Fuzzy-Sliding-Mode Control with Application to Smart Structures. Seung-Bok Choi, *Inha University, Korea*; and Myoung-Suk Kim, *Doowon Precision Industry Company, Korea* (**20**, 5, p. 857) Article

G97-138 On-Orbit Robust Control Experiment of Flexible Spacecraft ETS-VI. Takashi Kida and Isao Yamaguchi, *National Aerospace Laboratory, Japan*; Yuichi Chida, *Toshiba Corporation, Japan*; and Takeshi Sekiguchi, *National Space Development Agency, Japan* (**20**, 5, p. 865) Article based on AIAA Paper 96-3843

G97-139 New Results for an Asymmetric Rigid Body with

Constant Body-Fixed Torques. Rafael Livneh and Bong Wie, *Arizona State University* (**20**, 5, p. 873) Article

G97-140 More on Gain Adaptive Tracking. D. D. Sworder and J. E. Boyd, *University of California, San Diego* (**20**, 5, p. 882) Article

G97-141 New Algorithm for Attitude Determination Using Global Positioning System Signals. John L. Crassidis, *Catholic University of America*; and F. Landis Markley, *NASA Goddard Space Flight Center* (**20**, 5, p. 891) Article

G97-142 Approximate Decoupling Flight Control Design with Output Feedback. S. Park and M. G. Nagati, *Wichita State University* (**20**, 5, p. 897) Article based on AIAA Paper 93-3880 CP934

G97-143 Trajectory Matching Flight-Path Optimization of Aerospace Vehicles. Rush D. Robinett and G. Richard Eisler, *Sandia National Laboratories* (**20**, 5, p. 903) Article

G97-144 Analysis of the Frequency, Damping, and Total Insensitivities of Input Shaping Designs. Lucy Y. Pao, *University of Colorado* (**20**, 5, p. 909) Article based on AIAA Paper 96-3844

G97-145 Pointing in Real Euclidean Space. Itzhack Y. Bar-Itzhack and Daniel Hershkowitz, *Technion—Israel Institute of Technology*; and Leiba Rodman, *College of William and Mary* (**20**, 5, p. 916) Article

G97-146 Fuel-Optimal Periodic Control and Regulation in Constrained Hypersonic Flight. Larry D. Dewell and Jason L. Speyer, *University of California, Los Angeles* (**20**, 5, p. 923) Article

G97-147 Robust Longitudinal Control Design Using Dynamic Inversion and Quantitative Feedback Theory. S. Antony Snell and Perry W. Stout, *University of California, Davis* (**20**, 5, p. 933) Article based on AIAA Paper 96-3783

G97-148 Improved Eigenstructure Assignment Controller Design Using a Substructure-Based Coordinate System. Michael J. Triller and Daniel C. Kammer, *University of Wisconsin* (**20**, 5, p. 941) Article

G97-149 Two-Dimensional Active Wing/Store Flutter Suppression Using $\mathcal{H}_\infty$ Theory. Prasad V. N. Gade and Daniel J. Inman, *Virginia Polytechnic Institute and State University* (**20**, 5, p. 949) Article

G97-150 Describing Function Analysis in the Presence of Uncertainty. Jorge E. Tierno, *Honeywell Technology Center* (**20**, 5, p. 956) Article

G97-151 Helicopter Attitude Command Attitude Hold Using Individual Channel Analysis and Design. Graham J. W. Dudgeon and Jeremy J. Gribble, *University of Glasgow, Scotland, UK* (**20**, 5, p. 962) Article

G97-152 Analysis of Adaptive Neural Networks for Helicopter Flight Control. Jesse Leitner, *Air Force Research Laboratory*; and Anthony Calise and J. V. R. Prasad, *Georgia Institute of Technology* (**20**, 5, p. 972) Article based on AIAA Paper 95-3268 CP957

G97-153 Flight-Test Results of Propulsion-Only Emergency Control System on MD-11 Airplane. John J. Burken and Frank W. Burcham Jr., *NASA Dryden Flight Research Center* (**20**, 5, p. 980) Article based on AIAA Paper 96-3919

G97-154 Reformulation of Edelbaum's Low-Thrust Transfer Problem Using Optimal Control Theory. Jean Albert Kechichian, *The Aerospace Corporation* (**20**, 5, p. 988) Article based on AIAA Paper 92-4576 CP9210

G97-155 Optimal Low-Thrust Interception of Earth-Crossing Asteroids. Bruce A. Conway, *University of Illinois at Urbana–Champaign* (**20**, 5, p. 995) Article

G97-156 Trajectory Optimization Using Nonsingular Orbital Elements and True Longitude. Jean Albert Kechichian, *The Aerospace Corporation* (**20**, 5, p. 1003) Article

G97-157 Autonomous Optical Guidance and Navigation Strategy Around a Small Body. Jun'ichiro Kawaguchi, Tatsuaki Hashimoto, Takashi Kubota, and Shujiro Sawai, *Institute for Space and Astronautical Science, Japan*; and Gene Fujii, *International Space University, France* (**20**, 5, p. 1010) Article

G97-158 Optimal Mass Flexible Tethers for Aerobraking Maneuvers. Jordi Puig-Suari, *Arizona State University* (**20**, 5, p. 1018) Article

G97-159 Adaptive Nonlinear Attitude Control and Momentum Management of Spacecraft. Scott J. Paynter and Robert H. Bishop, *University of Texas at Austin* (**20**, 5, p. 1025) Article

G97-160 ALEXIS Spacecraft Attitude Reconstruction with Thermal/Flexible Motions Due to Launch Damage. Mark L. Psiaki, *Cornell University*; James Theiler, Jeffrey Bloch, and Sean Ryan, *Los Alamos National Laboratory*; and Robert W. Dill and Richard E. Warner, *AeroAstro, L.L.C.* (**20**, 5, p. 1033) Article based on AIAA Paper 97-3617 CP9710

G97-161 Stability Analysis on Earth Observing System AM-1 Spacecraft Attitude Determination. Xipu Li, Jeffrey B. Boka, and Arthur J. Throckmorton, *Lockheed Martin Missiles and Space* (**20**, 5, p. 1042) Engineering Note

G97-162 Relationships Between Positioning Error Measures in Global Positioning System. Chansik Park and Ilsun Kim, *Samsung Electronics Corporation, Korea*; Gyu In Jee, *Konkuk University, Korea*; and Jang Gyu Lee, *Seoul National University, Korea* (**20**, 5, p. 1045) Engineering Note

G97-163 Extension of the Friedland Parameter Estimator to Discrete-Time Systems. Walter D. Grossman, *New Jersey Institute of Technology* (**20**, 5, p. 1047) Engineering Note

G97-164 Continuous Proximate Time-Optimal Control of an Aerodynamically Unstable Rocket. M. Kalyon, *Istanbul Technical University, Turkey* (**20**, 5, p. 1049) Engineering Note

G97-165 Evaluation of Practical Solutions for Onboard Aircraft Four-Dimensional Guidance. Patrick Hagelauer and Félix Mora-Camino, *Laboratoire d'Analyse et d'Architecture des Systèmes, France* (**20**, 5, p. 1052) Engineering Note

G97-166 Adventures on the Interface of Dynamics and Control. John L. Junkins, *Texas A&M University* (**20**, 6, p. 1058) Article based on AIAA Paper 97-0002

G97-167 Momentum Transfer Dynamics of a Gyrostat with a

Discrete Damper. Christopher D. Hall, *U.S. Air Force Institute of Technology* (**20**, 6, p. 1072) Article based on AIAA Paper 97-0107

G97-168 Optimal Reorientation Maneuver of Bias Momentum Spacecraft. Hyochoong Bang and Jong-ah Kim, *Korea Aerospace Research Institute*; and Myungsuk Kim, *Korea Telecom* (**20**, 6, p. 1076) Article based on AIAA Paper 97-0109

G97-169 Lyapunov Optimal Saturated Control for Nonlinear Systems. Rush D. Robinett and Gordon G. Parker, *Sandia National Laboratories*; and Hanspeter Schaub and John L. Junkins, *Texas A&M University* (**20**, 6, p. 1083) Article based on AIAA Paper 97-0112

G97-170 Reduced Effort Control Laws for Underactuated Rigid Spacecraft. Panagiotis Tsiotras and Jihao Luo, *University of Virginia* (**20**, 6, p. 1089) Article based on AIAA Paper 97-0113

G97-171 Nonlinear Predictive Control of Spacecraft. John L. Crassidis, *Catholic University of America*; and F. Landis Markley, Tobin C. Anthony, and Stephen F. Andrews, *NASA Goddard Space Flight Center* (**20**, 6, p. 1096) Article based on AIAA Paper 97-0114

G97-172 Nonlinear Adaptive Control of Spacecraft Maneuvers. John L. Junkins and Maruthi R. Akella, *Texas A&M University*; and Rush D. Robinett, *Sandia National Laboratories* (**20**, 6, p. 1104) Article based on AIAA Paper 97-3480 CP968

G97-173 Simultaneous Structural/Control Optimum Design of Composite Plate with Piezoelectric Actuators. Youdan Kim and Dongjun Kum, *Seoul National University, Korea*; and Changho Nam, *Hankuk Aviation University, Korea* (**20**, 6, p. 1111) Article based on AIAA Paper 97-0246

G97-174 Orthogonal Square Root Eigenfactor Parameterization of Mass Matrices. John L. Junkins and Hanspeter Schaub, *Texas A&M University* (**20**, 6, p. 1118) Article based on AIAA Paper 97-0248

G97-175 Nonlinear Viscoelastic-Plastic Mechanisms-Based Model of an Electrorheological Damper. Gopalakrishna M. Kamath and Norman M. Wereley, *University of Maryland* (**20**, 6, p. 1125) Article based on AIAA Paper 97-0359

G97-176 Compensation for Distributed Hysteresis Operators in Active Structural Systems. A. J. Kurdila and G. Webb, *Texas A&M University* (**20**, 6, p. 1133) Article based on AIAA Paper 97-0361

G97-177 Unified Theory for Aircraft Handling Qualities and Adverse Aircraft–Pilot Coupling. R. A. Hess, *University of California, Davis* (**20**, 6, p. 1141) Article based on AIAA Paper 97-0454

G97-178 Analytical Relationships for Linear Quadratic Aeroelastic Flight Control Eigenvalues. Brett Newman and Ayman Kassem, *Old Dominion University* (**20**, 6, p. 1149) Article based on AIAA Paper 97-0457

G97-179 Optimum Mission Performance and Multivariable Flight Guidance for Airbreathing Launch Vehicles. David K. Schmidt, *University of Maryland* (**20**, 6, p. 1157) Article based on AIAA Paper 97-0458

G97-180 Continuation Method for Calculation of Transonic Airfoil Flutter Boundaries. Philip S. Beran, *U.S. Air Force Institute of Technology*; and Scott A. Morton, *U.S. Air Force Wright Laboratory* (**20**, 6, p. 1165) Article based on AIAA Paper 97-0574

G97-181 Induced Oscillations of a Finite Plate. J. D. A. Walker, C. N. Zhikharev, and T. J. Delph, *Lehigh University* (**20**, 6, p. 1172) Article based on AIAA Paper 97-0575

G97-182 Nonlinear Control of a Prototypical Wing Section with Torsional Nonlinearity. Jeonghwan Ko, Andrew J. Kurdila, and Thomas W. Strganac, *Texas A&M University* (**20**, 6, p. 1181) Article based on AIAA Paper 97-0580

G97-183 Adaptive Control of Aeroelastic Instabilities in Transonic Flow and Its Scaling. P. P. Friedmann, D. Guillot, and E. Presente, *University of California, Los Angeles* (**20**, 6, p. 1190) Article based on AIAA Paper 97-0581

G97-184 Identification of a Multistep-Ahead Observer and Its Application to Predictive Control. Ryoung K. Lim and Minh Q. Phan, *Princeton University* (**20**, 6, p. 1200) Article based on AIAA Paper 97-0683

G97-185 Generalized Holds, Ripple Attenuation, and Tracking Additional Outputs in Learning Control. Richard W. Longman and Chun-Ping Lo, *Columbia University* (**20**, 6, p. 1207) Article based on AIAA Paper 97-0685

G97-186 Using Probability Estimates to Identify Environmental Features for a Nonholonomic Control System. John-David Yoder, Steven B. Skaar, and Humberto Arriola, *University of Notre Dame* (**20**, 6, p. 1215) Article

G97-187 Modeling Fluid–Structure Interaction. José L. Ortiz and Alan A. Barhorst, *Texas Tech University* (**20**, 6, p. 1221) Article based on AIAA Paper 97-0785

G97-188 Differential Game Approach to the Mixed H_2/H_∞ Problem. Gregory D. Sweriduk and Anthony J. Calise, *Georgia Institute of Technology* (**20**, 6, p. 1229) Article based on AIAA Paper 94-3660 CP948

G97-189 Sequential Loop Closure in Design of a Robust Rotorcraft Flight Control System. Peter J. Gorder, *Kansas State University*; and Ronald A. Hess, *University of California, Davis* (**20**, 6, p. 1235) Article

G97-190 Minimum Model Error Approach for Attitude Estimation. John L. Crassidis, *Catholic University of America*; and F. Landis Markley, *NASA Goddard Space Flight Center* (**20**, 6, p. 1241) Article

G97-191 Autopilot Design for Bank-to-Turn Missiles Using Receding Horizon Predictive Control Scheme. Myung-Joon Kim, Wook Hyun Kwon, and Yong Ho Kim, *Seoul National University, Korea*; and Chanho Song, *Agency for Defence Development, Korea* (**20**, 6, p. 1248) Article

G97-192 Singularities of Nonlinear Attitude Control with Momentum Management. Scott J. Paynter, *Lockheed Martin Vought Systems*; and Robert H. Bishop, *University of Texas at Austin* (**20**, 6, p. 1255) Engineering Note based on AIAA Paper 97-0111

G97-193 Aerodynamic Parameter Estimation for High-Per-

formance Aircraft Using Extended Kalman Filtering. Juan García-Velo and Bruce K. Walker, *University of Cincinnati* (**20**, 6, p. 1257) Engineering Note based on AIAA Paper 95-3500 CP958

G97-194 Global Minimum Mass for Aerobraking Tethers. Steven G. Tragesser and James M. Longuski, *Purdue University*; and Jordi Puig-Suari, *Arizona State University* (**20**, 6, p. 1260) Engineering Note

G97-195 Low-Order Output Feedback Compensator for Tracking Systems. C. B. Asthana, M. Seetharama Bhat, and K. N. Swamy, *Indian Institute of Science* (**20**, 6, p. 1263) Engineering Note

G97-196 Dynamics of a Dual-Probe Tethered System. Joshua Ashenberg and Enrico C. Lorenzini, *Harvard–Smithsonian Center for Astrophysics* (**20**, 6, p. 1265) Engineering Note

G97-197 Dynamical Characteristics of a Tethered Stabilized Satellite. Joshua Ashenberg and Enrico C. Lorenzini, *Harvard–Smithsonian Center for Astrophysics* (**20**, 6, p. 1268) Engineering Note

G97-198 Aircraft Trajectory Optimization in the Horizontal Plane. Valery I. Heymann, *Israel Aircraft Industries, Inc.*; and Joseph Z. Ben-Asher, *Tel-Aviv University, Israel* (**20**, 6, p. 1271) Engineering Note

G97-199 Identification of Linear Model Parameters and Uncertainties for an Aircraft Turbofan Engine. Roman Leibov, *Technion—Israel Institute of Technology* (**20**, 6, p. 1274) Engineering Note

G97-200 Reversed-Series Solution to the Universal Kepler Equation. Andrew J. Staugler, David A. Chart, and Robert G. Melton, *Pennsylvania State University* (**20**, 6, p. 1276) Engineering Note

Thermal Structures for Aerospace Applications

Earl A. Thornton, Light Thermal Structures Center, University of Virginia

As aircraft flight speeds have increased and orbital missions have mandated complex space structures, the need for a deeper understanding of aerospace thermal structural behavior has grown. The purpose of this book is to study the basic problems of complex computer analysis as they relate to this behavior. With in-depth presentations, this book sets out to develop an understanding of the basic physical behavior of thermal structures, gain an appreciation for the role of classical engineering thermal and stress analyses, and apply computational methods to provide insight into realistic behavior.

Contents:
High-Speed Flight ¥ Orbiting Space Structures ¥ Concepts from Continuum Mechanics ¥ Heat Transfer in Structures ¥ Thermoelasticity ¥ Thermal-Structures Problems: Rods and Beams ¥ Thermal-Structures Problems: Plates ¥ Finite Element Thermal-Structural Analysis ¥ Thermally Induced Vibrations ¥ Thermal Buckling ¥ Thermoviscoplasticity ¥ Appendix: Finite Element Development of von K rm n Plate Equations

AIAA textbook
1996, 479, illus, Hardcover ¥ ISBN 1-56347-190-6
AIAA Members $69.95 ¥ List Price $84.95

CA and VA residents add applicable sales tax. For shipping and handling add $4.75 for 1–4 books (call for rates for higher quantities). All individual orders, including U.S., Canadian, and foreign, must be prepaid by personal or company check, traveler's check, international money order, or credit card (VISA, MasterCard, American Express, or Diners Club). All checks must be made payable to AIAA in U.S. dollars, drawn on a U.S. bank. Orders from libraries, corporations, government agencies, and university and college bookstores must be accompanied by an authorized purchase order. All other bookstore orders must be prepaid. Please allow 4 weeks for delivery. Prices are subject to change without notice. Returns in sellable condition will be accepted within 30 days. Sorry, we can not accept returns of case studies, conference proceedings, sale items, or software (unless defective). Non-U.S. residents are responsible for payment of any taxes required by their government.

Books Reviewed During 1997

Modern Astrodynamics: Fundamentals and Perturbation Methods, by Victor R. Bond and Mark C. Allman, *Princeton University Press* (20, 1, p. 215); reviewed by V. Coverstone-Carroll.

Control of Spacecraft and Aircraft, by Arthur E. Bryson Jr., *Princeton University Press* (20, 2, p. 407); reviewed by Christopher D. Hall.

Applied System Identification, by Jer-Nan Juang, *Prentice–Hall* (20, 3, p. 624); reviewed by Daniel J. Inman.

Dynamics of Flight: Stability and Control, Third Edition, by Bernard Etkin and Lloyd Duff Reid, *Wiley* (20, 4, p. 839); reviewed by Richard M. Howard.

Advances in Aircraft Flight Control, edited by Mark B. Tischler, *Taylor and Francis* (20, 5, p. 1055); reviewed by David K. Schmidt.

Spaceflight Dynamics, Second Edition, by William E. Wiesel, *McGraw–Hill* (20, 6, p. 1278); reviewed by David B. Spencer.

KEEP YOUR COMPETITIVE EDGE AS AN AIAA MEMBER

Five Years of Worldwide Aerospace Information for Only $250

The Aerospace Database: AIAA Member Edition

In cooperation with Knight-Ridder Information, AIAA is pleased to offer its members the past five years of Aerospace Database information (1992–1996) on CD-ROM, for the low price of just $250.

Get Direct Personal Access.

No online charges. Just an easy-to-use CD-ROM for your own personal use as an AIAA member.

Features:

- Comprehensive sorting capabilities
- Browse the Journal Name index for fast selections of articles
- Original language tracking
- Advanced searching
- Both Windows and Macintosh applications on the same disk

Take advantage of this offer. Order your CD-ROM today!
